OFFICE BUILDING

You are Invited

To visit our Nursery and see many acres of choice stock from which to make your selections. You will find it a most interesting trip, for many kinds of evergreens, trees, shrubs, and other plants are represented. We welcome the opportunity of showing you around and helping you to choose the plants best suited to your purpose.

Our office and Nurseries are on the Merrick Road, one mile west of the village of Babylon, L. I. You can't miss the place,—just look for the Dutch Windmill. Open Sundays during spring and fall.

SELECT YOUR PLANTS AT THE NURSERY

During planting season we have men on hand to dig and pack the plants you want. It is possible for you to drive to the Nursery and take your plants home with you. Or you can label the plants you select, and we will deliver them.

We cordially invite you to come when the trees and shrubs are in full bloom and select what you like then.

LANDSCAPE SERVICE

Landscape work is a science as well as an art. In order to accomplish satisfactory results, one must know the characteristics of plants, such as height, time of flowering, ultimate shape, suitability for sun or shade, adaptation to soil and exposure, etc. Our landscape men are well prepared, through training and experience, to help with planting work. We will gladly draw sketches and plans to fit your particular need. This service, in most cases, is rendered free of cost, except where elaborate plans, specifications, and special trips are necessary, in which case a small fee will be charged, which will be credited to customer's account when order is placed.

Our landscape representative is frequently in your vicinity, and will be glad to offer advice and make suggestions.

Appointments, at your home, any day including Sundays, will be gladly made and kept.

SPECIAL SERVICE

We are prepared to furnish competent gardeners at the proper seasons to do all kinds of garden work, such as general overhauling, summer and winter pruning, spraying, hedge-trimming, fertilizing, winter mulching, tree-repair work, etc. Such work is important and should only be entrusted to capable men.

Planting Seasons

Evergreens may be planted from the time the frost leaves the ground until the latter part of June, though early planting is much preferred. Some varieties can be moved satisfactorily during the summer months. August, September, and October are excellent months.

Plant shrubs, trees, and fruit trees from the latter part of March until June, and from the middle of October until the ground freezes.

Pot-grown Roses can be moved the entire summer and continue to bloom.

General Directions for Ordering and Our Terms

Always give address and desired time of delivery; otherwise we forward by the most economical route. Practically all our deliveries will be made by our trucks. Our free-delivery radius on orders amounting to \$10 or more extends 30 miles from our Nursery. This enables distant customers to get the benefit of local prices. During planting season, loads are combined for each locality at least twice a week. Beyond this 30-mile limit, a small charge will be made for delivery to cover cost, unless otherwise arranged at time of sale.

The cost of planting, if we do it, is borne by the purchaser. Our charge merely covers the cost of labor, fertilizer, etc.

GUARANTEE

Because all our stock is freshly dug and reaches the customer in fine, healthy condition, and because of the utmost care and skill used in growing our plants, we agree to replace any plants sold, at the prices published in this book, that may die within one year from date of delivery from other causes than abuse or neglect, but we make the following reservations:

The account must be paid within 30 days from date of invoice.

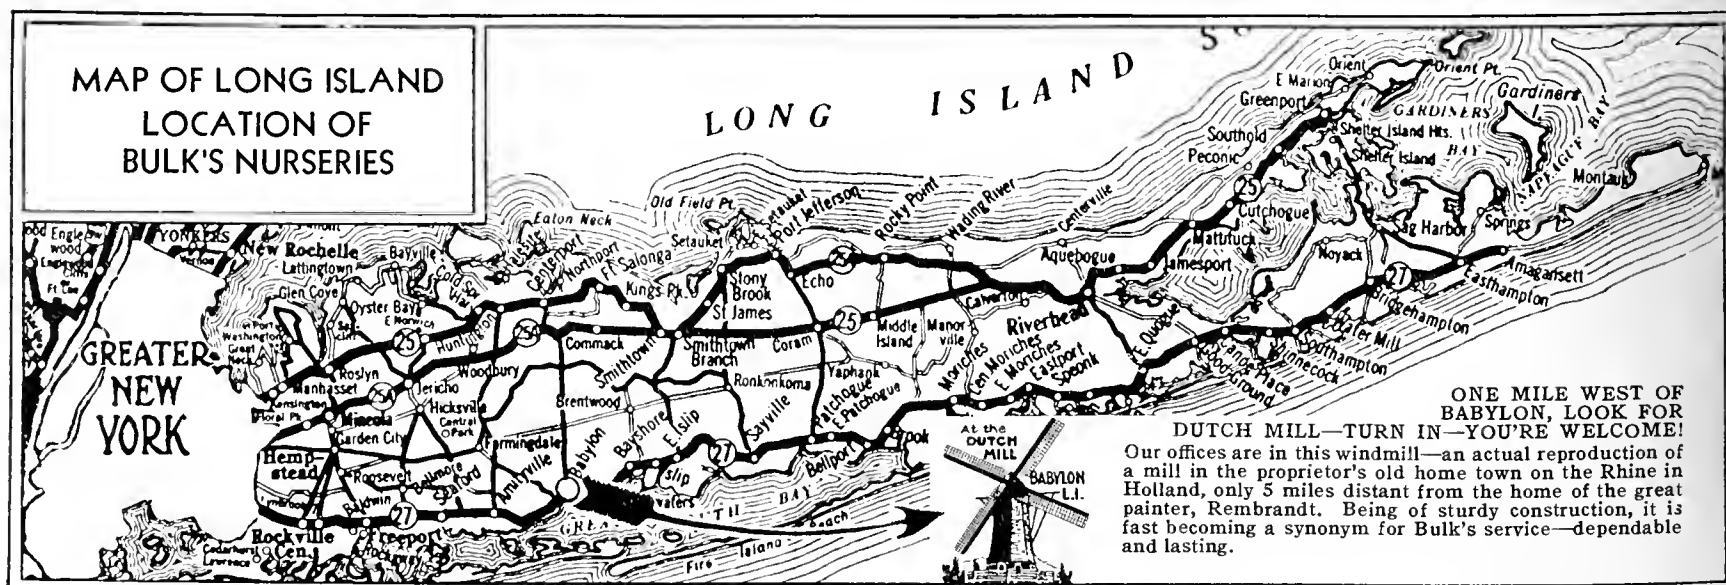

The customer pays the cost of delivery and planting of the replaced plants.

In the event we shall not have in stock, at the time for replacement, plants like those originally supplied, we are to apply the amount of credit representing the cost of the original plants toward the purchase of other plants that the customer may at the time select and which we can supply.

We guarantee our stock to be true to name and will replace any that prove otherwise or refund purchase price.

SUBSTANTIAL REDUCTION IN PRICES

Every item in this Catalog has been carefully checked, and we have reflected the benefit of lower costs and increased efficiency by greatly reducing prices. On a basis of quality we feel we are offering the best values obtainable anywhere, and invite you to compare these prices with those of any other reliable nursery.

EVERGREENS

IN this group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provides truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for any landscape plantings for both summer and winter effects.

ABIES · The Firs

Abies concolor. *White Fir.* Rapid-growing evergreen, with long, bluish green needles, and of symmetrical, upright habit. Splendid as a lawn specimen, as a contrast with the darker foliage of other trees, and is also useful in screen and border plantings.

Evergreen Hedges

FROM time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy. Until recently an evergreen hedge meant quite an expense, but they have now come down to a price-level within the reach of every home-owner. We invite you to compare the prices listed below with the cost of a fence.

ARBORVITÆ

American. Makes a very dense, fast-growing hedge and will reach considerable height if left to grow. Set plants 2 to 3 feet apart.

Ornamental and Shade Trees

IN addition to the trees which are valued for their shade, there are flowering trees which, at different times during the spring and summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

ACER - The Maples

Acer dasycarpum. *Silver Maple.* Foliage light green, silvery underneath. One of the hardiest and fastest growing shade trees. Prefers rich, moist soil but will thrive almost anywhere except on dry ground.

Increases Property Value

Beautifying your home grounds is an investment which pays immediate dividends. The moment you set an ornamental or fruit tree, a shrub, plant or vine, your property becomes more valuable and desirable. Real estate dealers have estimated that the addition of a few trees and shrubs in a new subdivision often increases the property value 20%. Most things depreciate from the minute of purchase. Planting is one of the few investments that do not depreciate but ever bring increased returns in actual value and satisfaction.

Flowering Crab

FLOWERING SHRUBS

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry-yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early spring until fall. In the list that follows will be found shrubs for all such purposes.

AMELANCHIER

Amelanchier canadensis. *Downy Shadblow.* White flowers in early spring before the leaves, and in June sweet berries very much relished by birds. Each

HARDY ROSES

R OSES—the mere name is an inspiration to garden lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each spring.

All Roses, except field-grown Hybrid Teas and Hybrid Perpetuals, carry our regular guarantee

HARDY PERENNIALS

It is no wonder that these old-fashioned hardy garden flowers continue to increase in popularity, for there is not a time during the whole flowering season when some hardy perennial is not in bloom, and when, during the late summer, few shrubs are in blossom, these little plants may be depended on for attractive display.

Plant perennials this year in the flower-bed where you have been using annuals. Every year you have to replace annuals, whereas the perennials come up each season with very little work or expense.

You do not need a large estate to have an old-fashioned garden or border from which you can pick flowers from early spring until late fall. Let us help plan your garden.

The size mentioned in the description indicates the height the plants may be expected to attain at maturity; the month represents the season of bloom.

Perennials marked (†) are suitable for rock-gardens

FRUITS

In the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield, which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide blooms for cutting.
